(1) Oracle Standard Edition One may only be licensed on servers that have a maximum capacity of 2 sockets. If licensing by Named User Plus the minimum is 5 Named User Plus licenses.

(2) These programs are designated Oracle 1-Click Ordering Programs.

(3) Oracle Database Standard Edition can only be licensed on servers that have a maximum capacity of 4 sockets. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses. Oracle Database Standard Edition, when used with Oracle Real Application Clusters, may only be licensed on a single cluster of servers supporting up to a total maximum capacity of 4 sockets.

(4) If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.

(5) Personal Edition provides a maximum of one Named User Plus per database.

(6) Enterprise Edition Options (with the exception of In-Memory Database Cache) and Database Enterprise Management Packs must match the number of licenses of the associated Oracle Database Enterprise Edition. In addition, a minimum of 25 Named User Plus licenses per Processor must be met. In the case where the minimum number of Named User Plus license are/were purchased, the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. If licensing by Processor the number of licenses may not match due to variance in core factors between the time the respective programs were licensed. Associated Database is defined as the database(s) which is (are) being managed by the option. For the purposes of licensing Active Data Guard, both the primary and standby servers must be licensed.

(7) These are designated SaaS for ISVs programs.
